GS Series

The GS series is a graphic foil that has been specially designed for very high working speed with excellent coverage on most untreated paper, ink printed and lacquered surfaces.

Characteristics

- Suitable for high speed stamping on all types of stamping machines
- Very high working speed
- Excellent heat and abrasion resistance
- Suitable for vertical, cylinder and high-speed rotary stamping machines
- Excellent coverage on unprinted, printed and lacquered surfaces
- Extremely clean definition with dust free printing
- Very high gloss
- Excellent for dust free, fine definition.

Applications

Cosmetic cartons, cigarette packages, confectionery packages, wine and spirit boxes, greeting cards, paperbacks, wine and spirit labels, all other uses in graphics industry.

Stamping Temperature

- Vertical and platen presses :
90-110 °C / 194-230 °F
- Cylinder machines :
140-160 °C / 266-302 °F
- Steuer Foiljet :
210-230 °C / 410-446 °F
