

**TECHNICAL DATA  
AND  
SPECIFICATIONS**

***Metallics***

**KFR**

The KFR Series was specifically formulated cold foil for flexo printing processes. The KFR series is the next generation of ITW cold foil that exhibits excellent transfer for fine to large area coverage, while minimizing piling on the blankets during the printing process. This benefit allows for great up time, longer blanket life and easier clean-up. Any color can be reproduced through over printing on KFR Series silver foil.

**Characteristics**

- No make-ready time.
- Good overprintability with UV-ink and UV-lacquers.
- Fine definition with easy release.
- Suitable for fine line and broad area transfer.
- Good adhesion on UV-adhesives used in the cold foiling process.
- Halogen free products.
- Speeds of up to 120m/min can be achieved.

**Substrates**

- Plastic materials like PE, PP, PET
- Paper with non-absorbent surfaces.

**Storage Shelf Life**

- 12 month under normal condition (10 ~35 C, Below 60% RH)
